Scope of Services – Production Company

The Production Company must include the following in their proposal:

1. Overall management:
 - a. Responsibility for all creative and technical elements for the entire project, including all breakouts, on property receptions, power, rigging, etc. even if in house A/V is utilized.
2. Dedicated Project Manager / Technical Producer:
 - a. To be the single point of contact for Morgan Stanley's producers, planners, and client for the duration of our pre-production and production process. We expect the Project Manager / Technical Producer to be available for all calls, site visits, and onsite for all load in and events. They should be considered the conduit for all information between the Production Company and Morgan Stanley and to remain consistent from 10 weeks prior to the first event through the closing of the final budget.
3. In Person Meetings and Site Visits for Project Manager / Technical Producer:
 - a. Site visits to all venues should be accounted for in your proposal.
 - i. The project manager / Technical Producer is expected to be onsite for 1 site visit per venue. Allow for 1 travel day and 1 site visit day each.
 - ii. Morgan Stanley will pay for hotel and travel. All other expenses should be accounted for in your budget.
4. Supply and update drawings
 - a. to include seating layouts to aid the overall production including but not limited to General Session, all breakouts, registration, expo, receptions, and offices
 - b. If there is a specific number of updates or time allotted for drawing and updates this must be included in your budget response. Additional drawing time will not be compensated without an approved change order submitted prior to incurring any additional charges.
 - c. Drawings should be accurate and to scale.
5. Coordination of all mandatory regulations, venue requirements and deadlines including but not limited to fire and union.
 - a. Involve all required parties in document distribution and achieve signoff.
6. Reference Morgan Stanley production documentation and provide equipment that meets or exceeds minimum specifications.
7. Responsibility for all labor relations and coordination
 - a. Supply and coordinate all onsite production staff
 - b. Key positions consistent throughout series
 - c. Utilize union labor as needed and budget accordingly. Avoid labor duplication and shadow labor whenever possible. In Union and non-Union locations, if the in-house team can be utilized as cost avoidance please propose this solution even if it means utilizing in house equipment.
 - d. Schedule and provide adequate meal breaks to ensure regulations are met
 - e. This includes the crew arranged by the Production Company as well as scheduling and monitoring of crew and hours to ensure compliance with local union and facility regulations.
8. Document Creation and Management
 - a. Produce a detailed production schedule for the entire event, which will be updated periodically and customized to each venue

- b. Create and maintain rehearsal schedule
 - c. Produce and manage the showflow, and update promptly as needed for the inevitable changes to running order and speakers onsite
- 9. Manage content both prior to site and onsite as needed.
- 10. Project Manager / Technical Producer to participate in 2 weekly calls with Morgan Stanley from 10 weeks prior to the first event through the final budget and invoice submission.
- 11. Provide all insurance certifications to Morgan Stanley and venue.
- 12. All necessary cabling and accessories must be included at this time. Be aware of cable paths when planning and avoid crossing doorways
- 13. Coordinate directly with the venue directly on behalf of Morgan Stanley
 - a. Your proposal must abide by the Technical Resource Manual provided by in-house A/V at each venue
 - b. The charge for their technical supervisor (if required) must be built into the event budget.
 - c. Power, rigging, and IT as well as Union Costs may be exclusive through in-house A/V Vendor and/or hotel.
 - i. IT, Rigging, and Power costs should be excluded from your response. Instead, please submit the amount of IT, Rigging, and Power you require and Morgan Stanley will get the pricing from the venue. Any in House A/V costs will be billed to the Morgan Stanley Hotel Master invoice.
- 14. Project and Scope Changes
 - a. Any expenses anticipated past the initial approved budget must be submitted for written approval ahead of time via email or updated budget.
 - b. An updated budget must be resent to Morgan Stanley producer once Change is approved.
 - c. Change orders will be approved for project or scope changes only. They will not be approved for errors or omissions on the part of the Production Company.
- 15. All budgets should include all applicable taxes, fees and service charges.
- 16. As with all other Morgan Stanley proposals, you must provide an offer you would be prepared to repeat in the future. Special "one-off" pricing will be disregarded, as it is not in the long-term interest of our clients or our future relationship.
- 17. Please exclude crew accommodation and flights but include quantity in your submission.
- 18. All Morgan Stanley purchased items, including but not limited to all branded prints and backdrops as well as stage furniture, are to be disposed of after the event unless storage is discussed. Include this cost in your pricing.

Per your contract, we require a gear list and full transparency so we can assess the technical merits of your proposals.

Scope of Services – Venue IT Vendor

The IT Vendor should take into account the following in their proposal:

1. All hardwired Internet lines must be direct open connections to the outside world. We can provide MAC address for our routers if required to ensure our connections are open.
2. We prefer dedicated bandwidth per port to maintain critical parts of our network in the offices – please indicate what options are available to us.

Scope of Services – IT Vendor

The IT Vendor should take into account the following in their proposal:

1. Overall management:
 - a. Responsibility for all office and IT for the entire project
 - b. Include a dedicated IT Technician consistent throughout entire series.

We require a gear list and full transparency so we can assess the technical merits of your proposals.

Dress Code

Please wear casual attire for set up days. When setting up or dismantling at our events, we would like crew to wear the approved attire of the company that employs them. Regardless of the vendor Health and Safety rules, we would expect anyone in a setup or dismantling role to be wearing protective footwear as an absolute minimum.

Business attire is appropriate for all 4 meeting days. Variations to this are permitted on certain jobs, especially if your attire would compromise your safety.

- Dress pants or skirts / dresses
- Jackets or sweaters required when working with attendees
- Should you choose to not wear a jacket or sweater due to the heat please wear long sleeve dress shirts in a jackets absence.

Axioms

Sustainable and Repeatable

All items proposed in a budget should be considered repeatable in perpetuity. There should be no special offers or one-off pricing to win a project.

Communications

Problems can occur throughout pre-production, load-in, on-site, and load-out. It is imperative that the Morgan Stanley event producer is informed immediately of any situation so they can be involved in the decision-making process and remediation timelines. Any attempt to resolve problems without informing the producer will damage the spirit of the relationship.

Accuracy

Whatever is requested in a brief must be provided on the bid response. If certain items are not available or there are substitutions, it must be clearly communicated during the proposal process. Similarly, if changes from an agreed scope develop in the course of pre-production, they must be clearly communicated. Do not assume that providing higher quality or better specification equipment is acceptable. A sudden increase in quality may not be repeatable in a future year.

Professional

All communication is audited by the firm and governmental agencies. Communication can be friendly and casual, but it always must be professional. Avoid sloppily written mobile emails. On site, staff should be briefed to pay particular attention to attendee's questions. We never know when an executive may approach a crew member and we request the team be prepared to professionally point them in the right direction or solicit help from a production lead.

Presentable

All staff, including crew members and contractors, must be presented in a professional manner. This includes having clean attire and uniformity across the team, everyone should look like a clean and cohesive team. The key leads should be in a sports coat/blazer (or female equivalent)—ties are not required.

Secure

As a financial institution, security is absolutely a critical part of our business. Significant care is paid in regard to ensuring all communication is handled in a secure manner. Protocols are in place for file sharing and must be followed.

Draft Agenda (as of 3/6/23)

Day 1

- 3pm – Registration Opens
- 4-5pm – Manager Forum
- 5-7pm – Cocktail Reception

Day 2

- 7:30am – Breakfast
- 8am – General Session
- 10-11:35am – Manager Forum
- 11:35 – 12:35pm – Lunch
- 12:35pm – General Session
- 3:15pm - Departures
